Attention: ~~Mr. S. J. Tracy~~ Assistant Director

Dear Sir: ~~PERSONAL AND CONFIDENTIAL~~

Enclosed is a length of developed 35 mm. Mini-Pan film containing what has been described to us as reproductions of codes numbers 63 and 65 used currently by the Brazilian consular corps in the United States and possibly by the Embassy in Washington.

In the event material is obtained at this field office which may be encoded by the use of these books, such material will be forwarded to the Bureau.

It is my thought that these books will be of value to the Bureau mainly in Washington, since the greatest volume of messages originate and terminate there.

In the event it is determined by the Bureau that these books are not currently in use; that in addition to these, a double enciphering or encoding device is used; that additional explanatory information is required for their use; or that the code is changed at a later date, this office should be immediately notified.

Due to the irreplaceable nature of this film, a copy has been furnished to us, which will be forwarded to your attention by regular mail, registered, with a copy of this letter. The copy will be sent when we have received the return receipt card used on this package and letter.

Very truly yours,

Please be informed that in accordance with the original request of the Laboratory of May 5, 1942, arrangements were made with the Chief Cable Censor, with the Cable Censor, New York, and with the New York Office of the FBI so that copies of [redacted] would be obtained from the Cable Censorship. In response to our request, the New York Office has advised that it has received the assurances of the Cable Censorship that all such messages are being turned over to the FBI Liaison Agents. As each subsequent request has been received from the Laboratory, it has been transmitted to the Cable Censorship. We are now informed by the Chief Cable Censor that all Cable messages we have requested are being furnished to us. It is noted that there has been an indication that the Laboratory does not feel that all messages are being received. I do not feel that we can go behind the assurances of the Cable Censor that we are getting all the messages. If any such evidence that we are not getting these messages comes to the attention of the Laboratory and if it is transmitted to me, I shall be very glad to take the matter up with the Cable Censorship.

It is also noted that a request was received in the Laboratory for [redacted] The Chief Cable Censor has informed us there have only been [redacted] since last Summer. The New York Office was requested to obtain all back traffic on file and to make arrangements to obtain all current messages and if any are obtained they will be

PERSONAL AND ~~CONFIDENTIAL~~

Dear Sir: Attention: Assistant Director S. J. Tracy

b7E

Enclosed are telegraphic messages [REDACTED] inclusive.
some of which are [REDACTED]

With regard to those [REDACTED] it is requested that this office be furnished with two copies on onion skin paper of complete translations and that a separate sheet be used for each message if practicable. It will be noted that they are numbered chronologically. It is requested that the translations be numbered to conform with the message enclosed herewith.

With regard to those [REDACTED] it is requested that the Bureau attempt to furnish [REDACTED] to this office in the same manner as outlined above with regard to those [REDACTED]. In addition, in the event it is found such messages [REDACTED] it is requested that the messages be copied as they are and that copies of the messages [REDACTED] be returned as outlined above. This additional request is made at this time for the reason that the Bureau may be in a position at a later date [REDACTED] and furnish [REDACTED] text to this office. At such time the [REDACTED] returned to this office will be destroyed and the [REDACTED] messages inserted numerically in our message file. In this way we will be able to examine a complete file of these messages over a long period of time and when considered with other information already available, develop a more accurate picture [REDACTED] if any exist, with regard to these persons in this Field Division.

b7E

If any [REDACTED] messages in the English language are included in the enclosures, it is requested this office simply be supplied with two copies numbered to conform with the enclosures.

b7E

It is my thought that the above plan will not only supply this office with a complete message file regarding these persons as mentioned above but that the originals retained in the proper Bureau files will, when correlated with other information already there, be of considerable value to the Bureau [REDACTED] in this country, in supplying various Field Offices with investigative material, and possibly in connection with certain other activities.
